REMARKS / ARGUMENTS

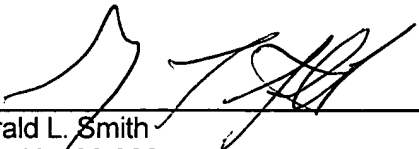

Consideration of the above-identified application respectfully requested.

The attached substitute drawing sheets are for the correction of typographical errors in the figure legends. Consequently no new matter is introduced by any of these amendments to the specification. All of the corrections of typographical errors pertain to numbering within the Figures. Figure 3 has been amended to conform with the numbering of the same parts as shown in related Figure 2. As such, the label '44' has been corrected to read '40' and the label '32' has been added. In Figure 12, the label '278' has been corrected to read '298' with such designation apparent from the specification. Figure 18 has been corrected so that two labels '328' now read '334,' with such designation clear from the description in the specification. One label '328' remains as originally presented. Several typographical errors in the labels in Figure 26 have been corrected, specifically label '398' is corrected to read '392,' part '399' is corrected to read '398,' part '486' is corrected to read '436,' part '484' is corrected to read part '434,' part '442' is corrected to read part '422,' and parts '442a' and '442b' are corrected to read parts '422a' and '422b,' respectively. Marked up original drawing sheets showing the corrections of typographical errors follow these written remarks.

Entry of these amendments to the drawings and earliest allowance of the application is respectfully requested.

Respectfully submitted,

Date: 25 Mar 05
